Education

2025

Mission Ready

Full Stack Developer Diploma

2019

Victoria University of Wellington

Bachelor of Commerce

Management, Marketing, Commercial Law

Skills

Technical Skills

- **Languages:** JavaScript, HTML5, CSS3, SQL
- **Frontend:** React.js
- **Backend:** Node.js
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Tools & DevOps:** Docker, Postman, VS Code, Figma, Azure, AI prompting, JIRA, Git & GitHub

Professional Skills

- Project Management
- Process Improvement
- Logistics & Supply Chain
- Stakeholder Management
- Report Writing

Andy Guffey

Full Stack Software Developer

Having recently completed a Diploma in Full Stack Development at Mission Ready. I am gaining hands-on experience with modern web technologies including JavaScript, React, Node.js, and databases.

My background in project coordination and logistics across FMCG, manufacturing, transport, insurance, and public sectors has built strong problem-solving and collaboration skills. I'm adaptable, committed to continuous learning, and excited to apply my growing development expertise to real-world projects where I can contribute and grow as part of a team.

Projects

NZMAI Platform Migration

Next.js · Supabase · Tailwind CSS · Vercel

Led the architectural transition of a mortgage services platform from a legacy no-code (Bubble.io) environment to a high-performance full-stack application.

- Architected a scalable Next.js framework featuring complex middleware routing and Role-Based Access Control (RBAC) for secure resource management.
- Engineered a relational PostgreSQL schema via Supabase, migrating legacy data to a robust structure for improved integrity and scalability.
- Developed a library of high-performance frontend components, including interactive mortgage calculators, using Tailwind CSS to enhance user engagement.
- Automated the deployment pipeline using Vercel and Git, establishing a production-ready CI/CD workflow for the MVP launch.

Fuel Station Finder (Z Energy Concept)

MongoDB · Express · React · Node.js (MERN Stack)

Built a full-stack web application to help users locate Z Energy stations and view services based on live location data.

- Delivered during an 8-day sprint for Mission Ready's AI-Powered Full Stack Developer Diploma.
- Collaborated with UX/UI designers to implement Figma user flows and responsive layouts.
- Developed RESTful APIs and React components for dynamic station search and display.

TinaBot – AI Insurance Assistant

React.js · Node.js · Express · Google Gemini AI · Docker · Tailwind CSS

Created an AI-powered chatbot that provides personalised insurance recommendations.

- Integrated Google's Gemini AI SDK for real-time natural language responses.
- Designed a responsive chat interface with Markdown support and branded styling.
- Containerised with Docker and Nginx for scalable deployment and team portability.

AI Vehicle Recognition (Car Classifier)

React · Vite · Node.js · Azure Custom Vision

Developed a cloud-hosted image classification app using Azure AI services.

- Integrated a secure Node.js backend proxy to manage API keys.
- Deployed frontend via Azure Static Web Apps and backend via Azure App Services.
- Improved skills in secure API handling and cloud deployment pipelines.

Experience

Fonterra Co-operative Group Limited

Nov 2022 - Mar 2025

Process Operator

- Coordination of key manufacturing processes to uphold operational efficiency and safety.
- Ownership of quality checks to meet internal and external compliance standards.
- Identifying and addressing equipment malfunctions or process issues to effectively minimise downtime.
- Completing necessary documentation to ensure customer specifications are achieved, and SAP proficiency for supply ordering.

New Zealand Ministry of Foreign Affairs and Trade

Sep 2021 - Feb 2022

Business Process Coordinator

- Administered and supported MFAT's policy and process hosting system, including front-end HTML coding within SharePoint.
- Contributed to process design and continuous improvement initiatives across multiple departments.
- Collaborated with a wide range of stakeholders to identify system and workflow enhancements.
- Analysed and reported on performance measures in line with the Ministry's standard reporting cycle.

Suncorp New Zealand

May 2021 - Sept 2021

Life Policy Operations Consultant

- Investigated and verified legacy life insurance data to locate policyholders or next of kin, leveraging public databases and analytical research techniques.
- Managed and updated large datasets with precision, ensuring compliance and accuracy across internal systems.
- Applied a methodical, data-driven approach to problem-solving

Scania New Zealand Ltd

May 2019 - Dec 2020

Warehouse Lead

- Led and mentored a new warehouse team through the critical transition from a 3rd party provider to a new in-house National Distribution Centre.
- Authored and delivered comprehensive training on new systems and stock management software, enhancing team proficiency and operational readiness.
- Analysed existing workflows and provided key expertise to streamline operational processes, increasing efficiency in the new distribution centre.
- Spearheaded the successful handover of warehouse operations, ensuring continuity of service and accurate knowledge transfer.

Parts Administrator

- Managed end-to-end logistics and supply chain operations for the national supplier network, including time-sensitive emergency orders to minimise client downtime.
- Served as the primary liaison for a network of over 20 key clients and multiple overseas distribution centres, fostering strong relationships and ensuring clear communication.
- Prioritised and monitored multiple concurrent projects, guaranteeing the timely delivery of parts and accurate processing of invoices.
- Executed data-driven stock and inventory forecasting, improving stock availability and optimising supply chain performance.

Inwards Goods

- Managed inventory records and sales fulfilment, establishing a foundation in the company's core logistics and data management systems.
