

Andy Guffey

Full Stack Software Developer

027-922-9812 | Andyguffey10@gmail.com | [LinkedIn](#) | [GitHub](#)

Profile

Recent Full Stack Development graduate (Mission Ready) with hands-on experience in JavaScript, React, Node.js, and databases. Brings a strong background in project coordination and logistics across FMCG, manufacturing, transport, insurance, and public sectors, with well-developed problem-solving and collaboration skills. Adaptable, committed to continuous learning, and keen to apply growing development expertise to real-world projects.

Skills

Languages: JavaScript, HTML5, CSS3, SQL

Frontend: React.js

Backend: Node.js

Databases: PostgreSQL, MySQL, MongoDB

Tools & DevOps: Docker, Postman, VS Code, Figma, Azure, AI Prompting, JIRA, Git & GitHub

Professional: Project Management, Process Improvement, Logistics & Supply Chain, Stakeholder Management, Report Writing

Projects

NZMAI Platform Migration | *Next.js · Supabase · Tailwind CSS · Vercel*

- Led the architectural transition of a mortgage services platform from a legacy no-code (Bubble.io) environment to a high-performance full-stack application.
- Architected a scalable Next.js framework with complex middleware routing and Role-Based Access Control (RBAC) for secure resource management.
- Engineered a relational PostgreSQL schema via Supabase, migrating legacy data to a robust structure for improved integrity and scalability.
- Automated the deployment pipeline using Vercel and Git, establishing a production-ready CI/CD workflow for the MVP launch.

Fuel Station Finder (Z Energy Concept) | *MongoDB · Express · React · Node.js (MERN Stack)*

- Built a full-stack web application to help users locate Z Energy stations and view services based on live location data.
- Collaborated with UX/UI designers to implement Figma user flows and responsive layouts.
- Developed RESTful APIs and React components for dynamic station search and display.

TinaBot — AI Insurance Assistant | *React.js · Node.js · Express · Google Gemini AI · Docker · Tailwind CSS*

- Created an AI-powered chatbot that provides personalised insurance recommendations, integrating Google's Gemini AI SDK for real-time natural language responses.
- Designed a responsive chat interface with Markdown support and branded styling.
- Containerised with Docker and Nginx for scalable deployment and team portability.

AI Vehicle Recognition (Car Classifier) | *React · Vite · Node.js · Azure Custom Vision*

- Developed a cloud-hosted image classification app using Azure AI services.
- Integrated a secure Node.js backend proxy to manage API keys, and deployed via Azure Static Web Apps and Azure App Services.

Experience

Process Operator — Fonterra Co-operative Group Limited

Nov 2022 – Mar 2025

- Coordinated key manufacturing processes to uphold operational efficiency and safety.
- Owned quality checks to meet internal and external compliance standards.
- Identified and addressed equipment malfunctions or process issues to minimise downtime.
- Completed necessary documentation to ensure customer specifications were met, with SAP proficiency for supply ordering.

Business Process Coordinator — New Zealand Ministry of Foreign Affairs and Trade

Sep 2021 – Feb 2022

- Administered and supported MFAT's policy and process hosting system, including front-end HTML coding within SharePoint.
- Contributed to process design and continuous improvement initiatives across multiple departments.
- Collaborated with a wide range of stakeholders to identify system and workflow enhancements.
- Analysed and reported on performance measures in line with the Ministry's standard reporting cycle.

Life Policy Operations Consultant — Suncorp New Zealand

May 2021 – Sep 2021

- Investigated and verified legacy life insurance data to locate policyholders or next of kin, leveraging public databases and analytical research techniques.
- Managed and updated large datasets with precision, ensuring compliance and accuracy across internal systems.

Warehouse Lead / Parts Administrator / Inwards Goods — Scania New Zealand Ltd

May 2019 – Dec 2020

- Led and mentored a new warehouse team through the transition from a 3rd party provider to a new in-house National Distribution Centre.
- Authored and delivered training on new systems and stock management software, enhancing team proficiency.
- Managed end-to-end logistics and supply chain operations for the national supplier network, including time-sensitive emergency orders.
- Served as primary liaison for a network of over 20 key clients and multiple overseas distribution centres.
- Executed data-driven stock and inventory forecasting, improving stock availability and supply chain performance.

Education

Full Stack Developer Diploma — Mission Ready

2025

Bachelor of Commerce — Management, Marketing, Commercial Law — Victoria University of Wellington

2019
